Problem Statement

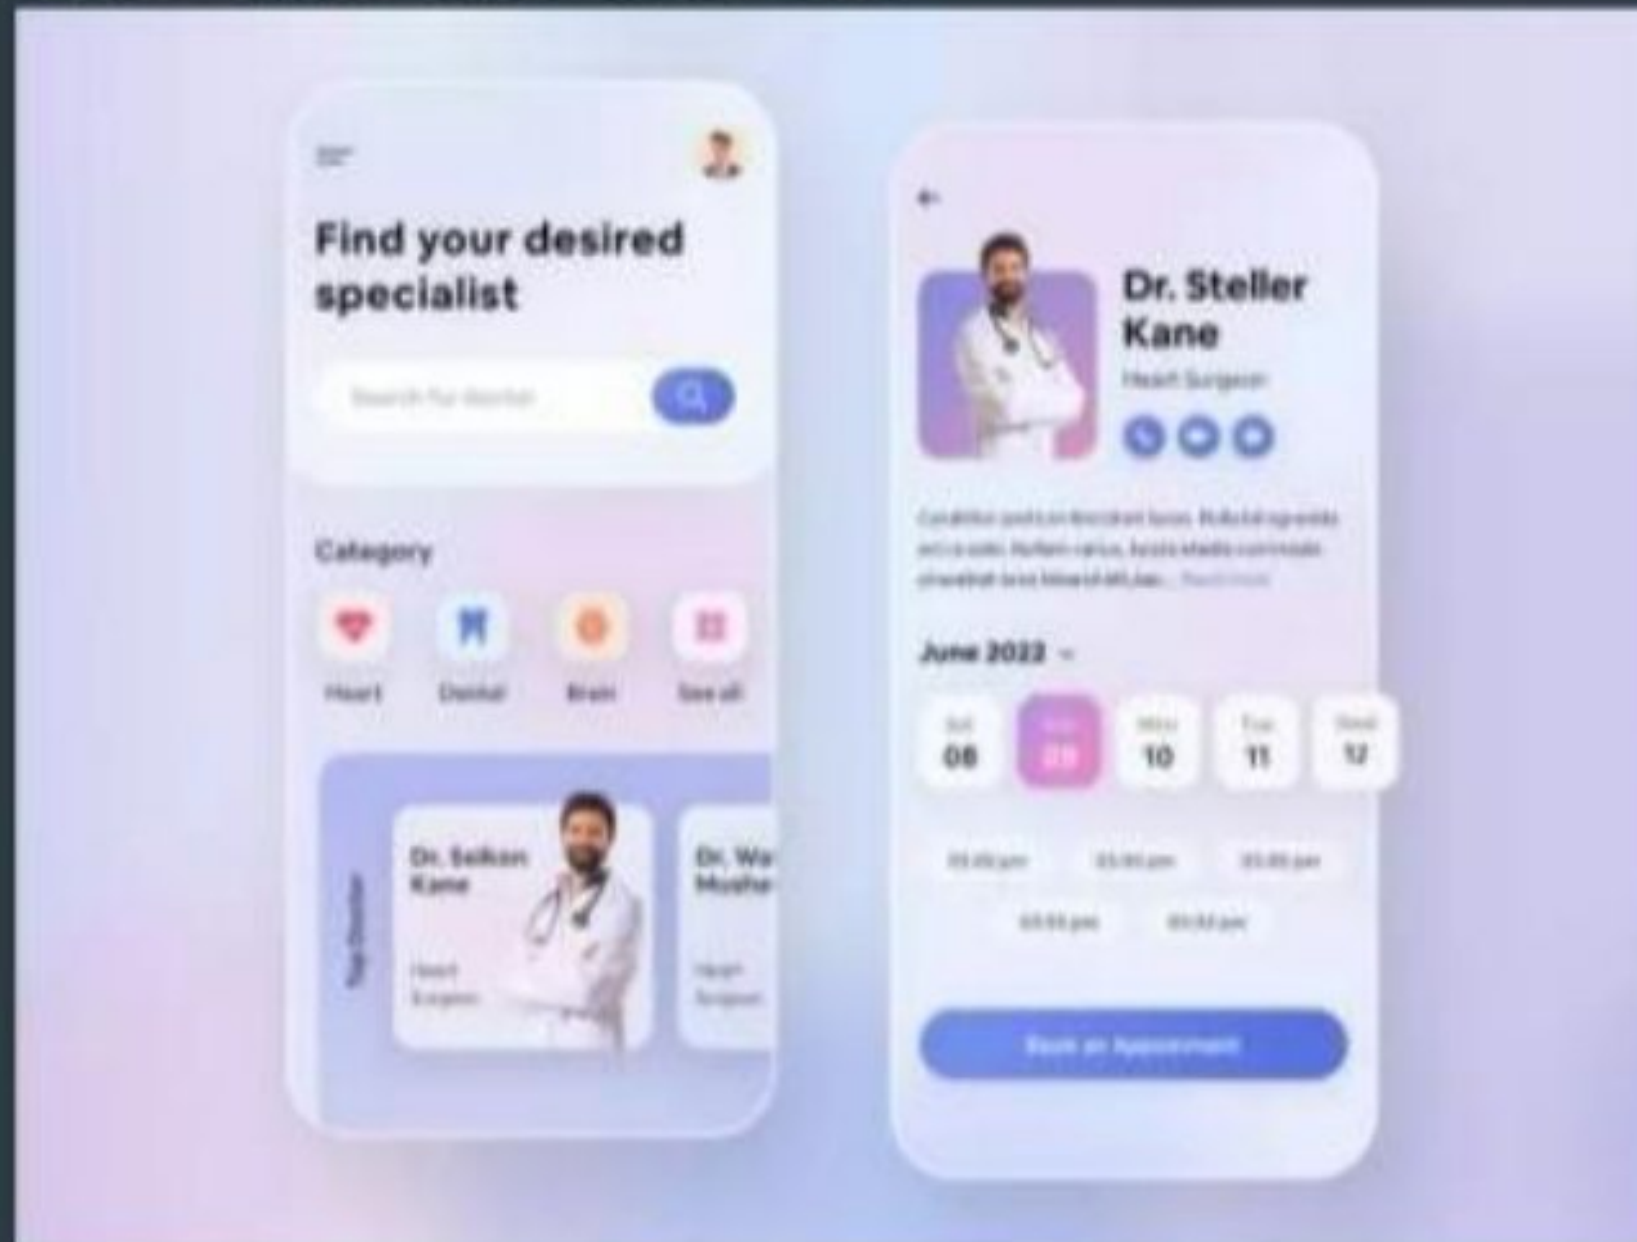

- ▶ long wait times to book appointments
- ▶ difficulty finding a doctor that matches specific criteria

Proposed Solution

- ▶ To address these challenges, we propose a doctor appointment MERN (MongoDB, Express, React, Node.js) app
- ▶ that enables patients to easily book appointments with their preferred doctors for a specific time slot and fee.

Key Features

- ▶ User login/registration
- ▶ Admin Panel
- ▶ Appointment based on specialization, experience, fee, timings
- ▶ Appointment history
- ▶ Appointment approval by admin team
- ▶ Suggest alternative doctors, if not available,
 - ▶ On the basis of:
 - ▶ Specialization
 - ▶ Experience
 - ▶ Fee
 - ▶ Timings

Conclusion

- ▶ Solution to the long wait times and difficulty in finding a doctor that matches specific criteria
- ▶ The app offers value for patients by allowing them to easily book appointments with their preferred doctors and providing transparency in terms of availability, fees, and qualifications.
- ▶ For doctors, it offers a platform to manage their schedules more efficiently
